

Rolling Stock Standards for Public Comment

The drafts " RDS 7512 "Railway rolling stock - Exterior environment" standards have been released for their second open review and comments are due by 12 December 2008. These standards cover environmental requirements on wayside noise, ground-borne vibration, exhaust emissions, waste & spillage and environmental management for rolling stock.

To download the standards visit the Rail Industry and Standards Board (RISSB) website at:
<http://www.rissb.com.au/site/STD%20Roll%207512%20Exterior%20Environment.php>

Any comments should be inserted into the relevant electronic documents and then the documents should be forwarded via email to the Project Manager for these standards at steven.rykers@qr.com.au.
