

Rail and Trucking Industries Join Forces

The Rail Industry Safety and Standards Board (RISSB) and Australian Trucking Association (ATA) are collaborating to create a level crossing installation in the ATA's educational vehicle 'The Road Ahead'.

Currently touring regional and rural Australian communities, the \$1.3 million interactive semitrailer educates school groups, local trucking operators and suppliers as well as MPs, local politicians and local councils with important road safety tips.

A fantastic opportunity for the rail and trucking industries to increase awareness and understanding of level crossing safety in Australia, the RISSB Board approved a level crossing display panel and interactive exhibit within the vehicle last week.
